

The First 7 Days With VestBlock Growth Services

A buyer-friendly launch plan for Search Visibility, AI Receptionist, or both. It gives prospects a concrete picture of what happens after they raise their hand.

Day 1

Review the website, offer, market, forms, calls to action, and current lead path.

Day 2

Map where visitors are getting lost and choose the highest-value first fix.

Day 3

Build the first recommendation set: pages, questions, booking path, or receptionist flow.

Day 4

Prepare the initial setup plan and confirm what access or business details are needed.

Day 5

Draft the customer-facing answers, lead questions, service-page ideas, and handoff logic.

Day 6

QA the experience on desktop and mobile, then test form and alert behavior.

Day 7

Deliver the first summary, priority list, and next 30-day plan for growth work.

Best first use

Use Search Visibility when the business needs more qualified visitors. Use AI Receptionist when leads are already arriving but getting missed, delayed, or poorly qualified.
