

AI Receptionist for Missed Leads and Faster Booking

A setup service for businesses that need a cleaner way to answer common questions, capture website visitors, qualify leads, and route people toward booking or follow-up.

Problem

Calls get missed, forms feel cold, visitors leave after hours, and staff repeat the same answers.

VestBlock Fix

We set up a trained receptionist flow that captures details and routes qualified visitors.

Outcome

Faster response, cleaner intake, and fewer dropped opportunities.

What customers get

- Website chat or receptionist setup aligned with the business offer, tone, and common questions.
- Lead capture fields that collect useful information instead of sending blank or vague inquiries.
- Qualification questions for appointment-led businesses so staff can prioritize better conversations.
- Booking or calendar handoff where the package includes scheduling support.
- Launch QA, first-round script tuning, and clear next-step recommendations after setup.

Packages

AI Receptionist Launch

Website AI chat installation, FAQ training, lead capture, alerts, and launch review.

**\$495 setup +
\$149/mo**
